

**Team Number:**

- 13-03

**Team name:**

- Jiffy Junction

**Team Members:**

- Alen Ramic, Axel VandenHeuvel, Luke Campbell, William Writer, Jacob Stiegler and Nabil Djaber

**Application Name:**

- EventEdu

**Application Description:**

- EventEdu is a “social media” platform where users can join communities of interest and discover new events within the community. The platform is optimized for CU Boulder students and will focus on events happening in the Boulder, CO area. Every user will need to create a profile and there is the option to follow other users and see what events your friends are attending. Any user can also submit a form to create a new event, and it will be added to the community event calendar for all other users to see.
- Website functionality will include a “Discover” page where different communities will be displayed. Users can filter communities by category or keyword search to find specific groups of interest to join. Each community will have its own “[Community Name]” page, which will display a calendar with all posted events within the group. Users can register to attend these events, which will display on the event page and user’s profile.
- Another key aspect of the platform will be a user profile page, which will display information including basic user data, groups joined, and events registered. The profile page will also include a friends list for users that know each other.

**Vision Statement:**

- For college students seeking event information and community engagement, the Campus Calendar Hub is a digital event platform that offers comprehensive event listings and interactive features. Unlike traditional event boards, our platform provides real-time updates and fosters a sense of community, connecting students to a world of opportunities at their fingertips.

**Version Control:**

- On Github

**Development Methodology:**

- Kanban Boards and SCRUM meetings

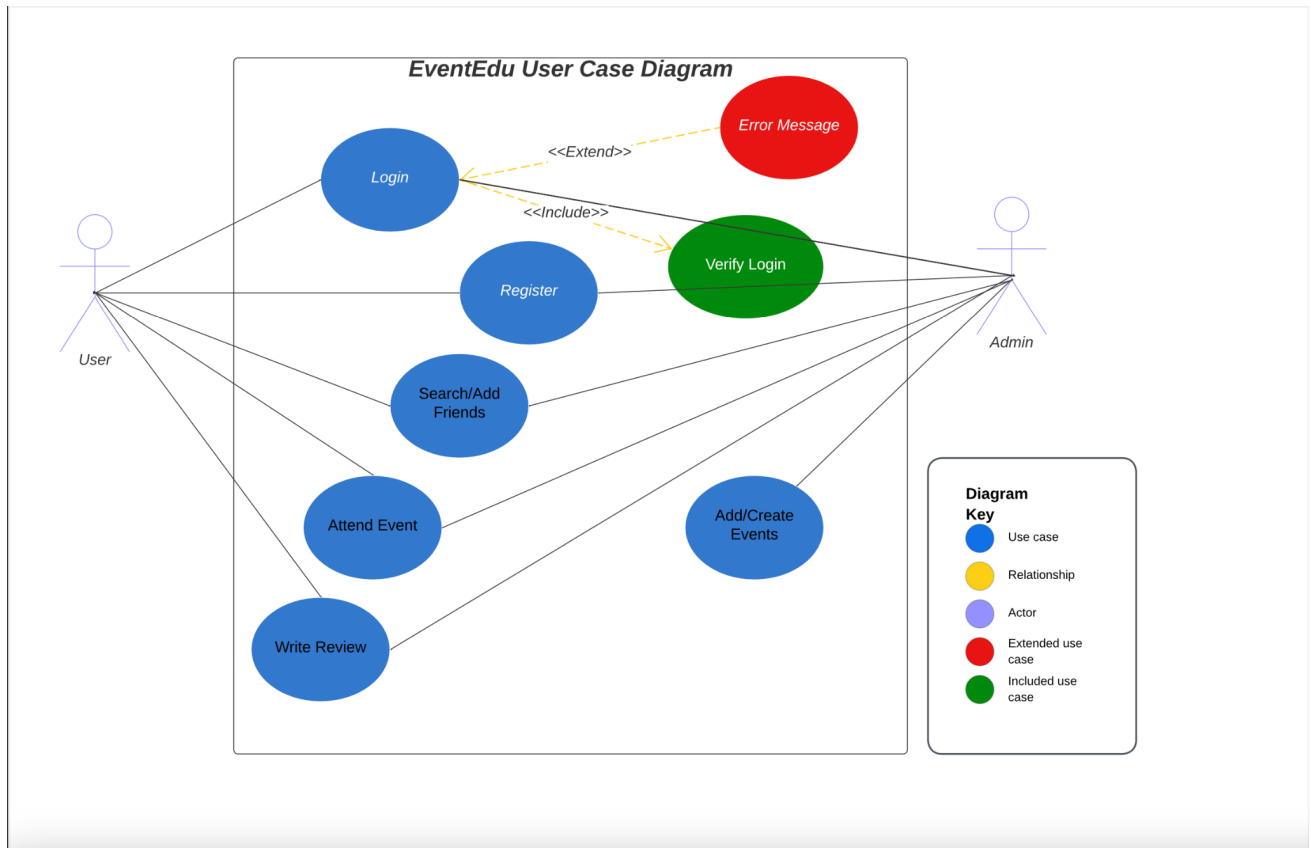

**Communication Plan:**

- We will be using discord as our main form of communication along with at least one weekly scrum meeting.

**Meeting Plan:**

- Our team will have scheduled meetings every Monday at 4:00pm, and will communicate continuously on Discord as needed.
- Our team will meet with the TA on 11/6 2:45pm, 11/14 2:15 pm, 11/28 2:15 pm, 12/5 2:15 pm
